

## Elementary Garden Project

Students at Union City Elementary have been tasting different fruit and vegetables all year long. Now is the time to teach them where some of these come from.

...How does your garden grow?

Did you know UC elementary will soon have a vegetable garden growing all kinds of yummy vegetables for our lunches? A committee of community volunteers—including parents, students, local farmers, environmentalists and others are busy working with the district to create a wonderful garden...and YOU can help!

On **Saturday, May 22**, we need as many big and little helpers as we can find at the garden site. We need help anytime from 9-2—if you can only stay for a little while, that's okay—come for as long as you can! We will need hammers, screwdrivers and levels —if you can bring any of these with you, that's great! Dress for the weather and the work—including gloves!! Parking is available at the UC elementary school at 90 Miles Street, Union City, PA.

For additional information, please contact the Food Service Department at 438-7673 ext. 5466.

Rain date: Sunday, May 23.
